Figure 1: The evolution of the $\hat{A}$ index for the 1967-1992 period. The figure shows the evolution of the $\hat{A}$ index for the 1967-1992 period. The x-axis represents the year, and the y-axis represents the $\hat{A}$ index. The index starts at approximately 0.5 in 1967, rises to about 0.7 in 1970, and then fluctuates between 0.6 and 0.8 until 1992. The index is generally higher for the 1967-1970 period and lower for the 1970-1992 period.
